But there seems to be no excuse for the neglect case was nothing but a "drunk."

All of Sunday night, all day Monday, and part of wind was rudely dispelled. Thesday, Harper lay on a cot and when he became delivious from pain he was strapped to his bed. Ten hours after a person receives a fracture at the base of the skull, physicians say it is an easy matter to the skull, physicians say it is an easy matter to learn his true condition by examining the pupils of the eyes, and in other ways familiar to physicians who know their business. But as far as could be learned yesterday, the physicians who are supposed to be lookyted by the eyes of the interests of patients in the ward of large out for the interests of patients in the ward of the best interests of the city would be subserved if the to take the trouble thoroughly to examine Harper and not until Tuesday morning that it was discovered nt was transferred to the surcical ward nd Drs. Hamblin and Chapman found that there were symptoms of a fracture at the base of the skull.

The discovery was made too late, however, and died a few hours afterward. Had it been own that he was suffering from a fracture when he from the City Hall to Broadway. reached the hospital, his life might have been saved. Harper was a married man and his widow said yestery that she had employed counsel to in-stigate the case and she declares that saits for damages will be in fluted against the doctor or doctors who permitted her husband to "die from sheer neglect,"

nduced yesterday to say much about it. Dr. fownsend was not so reticent. He made the follow ing statement: "I immediately examined the cuts on therper's head and face as soon as I reached him, to see if they were bleeding. They were not bleeding and did not bleed a drop aster my arrival. I then examined the patient carefully to see if any bones were broken. time had not affected him and I could not do more than was done on my part. I am anxious to have the case thoroughly looked into, as I know I could not have done more for the man than I did."

ELINTIC SHOCK ALTERS THE BLOOD.

An interesting and instructive paper was read by Dr. Lockwood, as the meeting of the Microscopical Society, last night, upon the effect of an electric shock on the blood of Kemmier, after he was killed by electricity, that the corpuscies of his blood became distorted and fractured and reduced at least one-third in size. This, the speaker said, proved conclusively that death in Kemmier's case was instantaneous. It was a remarkable fact, however, that the blood corpuscies lost none of their brilliancy under the electrical influence.

TWO STRIKES IN PROGRESS.

SERVICES OF THE STATH BOARD OF ARBITRA-TION DECLINED-THE BUILDING TRADE TROUBLE.

There was plenty of excitement for the striking akmakers yesterday. Early in the day Commissione movan, of the State Board of Arbitration, made at insuccessful attempt to settle the strike. Later in the day the strikers were thrown into great excitement by a rumor that their leader, Joseph Barondess, had been arrested again and taken to the Tombs where, believed, he would be speedily sent to the penitentiary. Commissioner Donovan made the following propositions: First-The union to appoint a committee with absolute power; Meyer Jonasson to do the same, at the same time calling in a mem per of the State Board of Arbitration to complete local board of arbitration. Second-The union to sub-mit its case to the State Board, which should give a decision within ten days; all the strikers to go to work at once on the same terms as before the strike. Third—The union to appoint a committee with full power to confer with Meyer Jonasson & Co., Commissioner Donovan to bring about such con-

only \$700. Earonae's recovered until Monday at 2:30 p. m.

The carpenters who struck Thursday because John Downey refused to discharge all the cabinetmakers who were working for him were jubilant yescerday. The gasfitters, steamfilters, tin and sheetiers workers and marble-outlers employed by Mr. Downey struck yesterday also. It was said by the strikers that about 1,000 men had struck. The Board of Walking Ledegates told Delegate Owen Carroll, of Eccentric Englacers' Union No. I, to order all the engineers employed by Mr. Downey to stop work last night and not return this morning. This will practically stop all work on the two large hords in Fifthave,, and the new power house for the Broadway croble read, at threadway and Fifty-first-st. This action was taken to compel the bricklayers to stop work.

The wood-carvers refused to strike yesterday. In consequence of this and the fact that the cabinet makers are still working for Mr. Downey, those Involutions were expelled by the Board of Walking Delegates yesterday. It is expected that about 200 men in other trades employed by Mr. Downey will strike today. Mr. Downey said yesterday that he believed the number of strikers had been overestimated. The strike was he said, simply a fight between two unloss. He proposed to remain firm and resist all attempts on the part of his employes to shake the policy of the firm.
